Wire Management Solutions Today**

SnapRack Wire Management Solutions

for the RL system provide all the necessary means of managing wires and cables in your solar array. Products are specifically engineered to manage module leads, cables, and electronic equipment so that you have a solution for every component of the rooftop installation.

Smart Clip I & II

- Unlike traditional wire clips, the Smart Clip holds wires securely above the module flange, preventing them from being loosened or damaged during wire management
- Available in two configurations for securing 1 or 2 module leads

Wire Saver

- Ideal for post-installation or post-inspection, the Wire Saver, allows installers to fix loose wires without removing modules

MLPE Frame Attachment Kit

- Integrated Smart Clip allows installers to tuck away wires and cables, helping to eliminate excessive clips along the module frame.
- All-aluminum Bracket-to-Frame contact provides superior hold and anti-rotation features

Quality. Innovative. Superior.

SnapRack Solar Mounting Solutions are engineered to optimize material use and labor resources and improve overall installation quality and safety.
