The SnapNrack Tile Replacement

provides the best solution for mounting Ultra Rail on tile roofs. It's versatility and simple design make it the easiest install experience of any tile replacement on the market.

Base Assembly

- Two piece design means less parts to keep track of up on the roof.
- Simply lag the base into place and slide the riser shaft into position for the tile replacement flashing
- Stud design on riser makes it easier to locate when installing flashing

Tile Replacement Flashing

- Profiles available to fit with all S-tile, Flat Tile and W-Tile types for any tile application
- Unique formable material makes installation on tile roof easy and flexible
- Specialized features such as rear support foot and front lip help add structure and improve the aesthetic finish
- Umbrella sealing technology ensures a fully weatherproof install that will stand the test of time

Total Package Benefits

- SnapNrack Tile Replacements create a source of tiles to replace those broken through installation and wear and tear
- Entire assembly and flashing packaged together for easy logistics on and off the roof
- Compatible with both UR-40 and UR-60 rail profiles

Quality. Innovative. Superior.

SnapNrack Solar Mounting Solutions are engineered to optimize material use and labor resources and improve overall installation quality and safety.
