

MightyMount

The simple but mighty mounting system.

Simplified parts create a lower profile and smaller footprint

Compatible with the Ultra Rail snap-in module clamps

Like all SnapNrack systems, it installs with a single tool utilizing a ½" Socket

Compatible with SnapNrack's industry leading RL-U Wire Management solutions

Start Installing MightyMount Today

The SnapRack MightyMount System

is a modified railless system designed for a smaller footprint and simple install experience on the roof. MightyMount roof attachments are compatible with applications that include composition shingle and trapezoidal metal roofs. The system installs by creating a precise layout for mounts, attaching mounts to the roof, laying down the panels, and securing them utilizing SnapRack Ultra Rail Mid Clamps and End Clamps. SnapRack's tradition of a single tool installation is carried on with the same 1/2" socket.

MightyMount Comp-S

- Small footprint to fit on a single course of shingles
- The rafter independent attachment eliminates the need to locate or find rafters for pilot holes
- Sealant vents on the exterior sides of the track as a visual indicator for a proper seal
- Familiar SpeedSeal™ Technology with a compressible barrier that secures sealant in place & fills voids
- Utilizes SNR Fully threaded Sealing Deck Screws (See installation manual or portfolio for spec)

MightyMount Metal-T

- Ability to mount on trapezoidal metal roofs like Carports
- Short & tall leg assemblies can be combined to create up to a 5° tilt option
- MightyMount Metal-T tracks are available in two sizes, 10" or 15", both featuring protective gaskets around fasteners for added sealing
- Utilizes standard EJOT Fasteners for installation (See installation manual or portfolio for spec)

Quality. Innovative. Superior.

SnapRack Solar Mounting Solutions are engineered to optimize material use and labor resources and improve overall installation quality and safety.
